

CONTENTS

Preface	
About the Book	
References	
Law of Analogy	
Dilution, dose, dynamisation, succession	
Infinitesimal dilution	
Dynamisation	
The Dose	
„ Homoeopathic	
„ Infinitesimal	
The Dilution limit	
The Methods of the Preparation of Homoeopathic dilution	
The Hahnemannian principle	
Centesimal dilution	
Decimal dilution	
Trituration	
Korsakovian method	
Muted Hahnemannian & Korsakovian method	
Continued fluxion	
Tre Fifty millesimal dilution	
Other methods of Preparation of Homoeopathic Dilutions	
Preparation of M.T.	
Mixture of the juice of the plant with an equal weight of alcohol	
Maceration of Fresh plants	
3 & 4 „ dried plants and Lixiviation	
Use of stabilised plants	
Mother tinctures in different Pharmacopeias	
The German Pharmacopeia	

The American Pharmacopeia	...	44
The French Pharmacopeia	...	46
Control of the preparations	...	47
Analysis by Chromatography, Capillary spectra...		48
Electrophoresis	...	49
Preparations of M.Ts other than vegetables	...	50
The Vehicles	...	51
Glycerine		
Solids	...	52
The Dilutions		
Liquids		
The Trituration	...	53
Impregnation of globules	...	54
Control for the Impregnation of Globules	...	55
„ Control	...	56
„ Quality of		
Volumetric evaluation		
By balancing		
Minimum dilutions of Medicines	...	57
Homoeopathic research : A Bibliographical Study	...	69
Homoeopathic research		
New Experiments of the Old Drugs	...	70
Provings of New Drugs	...	72
Application of Chromatography and Capillary Spectra	...	75
Radioactivation Method of Metals	•••	77
Research of a Physical Factor		
Experiments on the En\$e Animal	...	82
On Isolated organs of Animal		

(vii)

Biological Tests	—	84
Supplement	•••	87
Clinical Veterinary	...	89
Conclusion	•••	90
Evolution of Homoeopathic dilution	...	91
Lower Dilution: Evolution	...	92
The High Dilution	—	94
