## PART 1 PRINCIPLES AND IMPLICATIONS

- 1 Clinical method in homeopathy and its general relevance in medicine** 3  
*The phenomenon of illness and the homeopathic approach. Homeopathy, natural healing and placebo. The attraction of the homeopathic method. Natural history, pathography and research. Key points.*
- 2 Natural healing, holistic practice and ‘the black box’** 17  
*Thinking what we are doing. Natural medicine and natural healing. The holistic perspective.*
- 3 Homeopathy and the medical model** 37  
*An experimental work in progress. Exploring what homeopathy offers. Resistance. Limitations of homeopathy as a model. Appendix 3.1 – Ways of knowing.*

## PART 2 GENERAL PRINCIPLES

- 4 The basic principles of homeopathy** 63  
*Similarity. Versatility and specificity. Individuality. The clinical picture. Sensitivity and receptivity. Susceptibility and aetiology. Therapeutic response.*
- 5 General issues of management** 73  
*The use and value of time. An eclectic approach to illness. The consultation. Introducing homeopathy. Follow-up and change. The Healing Process. Hard work. Key points.*

- 6 When to use homeopathy** 97  
*Clinical setting and levels of expertise. Potential. Limitations. The supportive role. Combining homeopathy and conventional medication. First choice homeopathy. Boundaries of competence. Difficult cases and difficult patients. Key points.*

### **PART 3 CLINICAL METHOD**

- 7 Case taking** 111  
*Shifting our point of view. Referral and communication. Observation. Spontaneity. Language and meaning. Enquiry and the structure of case notes. Examination. Case notes and case analysis. Key points of case taking. Perspectives. Distinguishing 'levels' and 'layers'. Case 7.1 – Levels and layers. Evolution. Case 7.2 – Evolution of a medical history. Traits and miasms. Conclusion.*
- 8 Symptoms** 137  
*The individuality of symptoms. Types of symptoms. The totality of symptoms. Selecting and evaluating symptoms. Case 8.1 – Vietnam war veteran. Grading of symptoms. Case 8.2 – Reflux oesophagitis. Recurring themes. Symptoms from the past. Symptoms that do not fit in.*
- 9 Constitution** 163  
*The concept of constitution. Constitution in homeopathy. Treating the vulnerable constitution. Is there always a constitutional picture? Does the constitution change with time? Constitutional and clinical caricatures. Morphological types. Constitution and terrain. The constitution in chronic illness. The conventional view of constitution. Key points.*
- 10 Aetiology** 173  
*'Never well since.' Aetiological prescribing. Historical patterns. Miasms. Onset. Infection. Immunisation. Allergy. Iatrogenic reactions. Physical trauma. Psychological trauma and deprivation. Conclusion.*

<b>11 Treatment strategy</b>	<b>191</b>
<i>Strategic options. Permutations. Acute illness. Recurrent acute illness; episodic illnesses. Acute exacerbation of chronic illness. Intercurrent acute illnesses during chronic illness. Chronic and persistent illness. General principles of case management. Key points.</i>	
<b>12 The response to the prescription</b>	<b>207</b>
<i>Introduction. Proving. Aggravation. Sleepiness. Getting better. Well-being. Constitutional change. No change. Intercurrent events. The sequence of events and the multiplicity of change. Time-scale. The 'Laws of cure' and the direction of cure. Return of old symptoms. Elimination. New symptoms. Getting worse. Developing the regime. Conclusion. Challenges.</i>	
<b>PART 4 THE KEY ISSUES</b>	
<b>13 A Summary of the key issues</b>	<b>225</b>
<i>Challenges. Overview. Pathography and holography. Placebo – What if it is? What if it isn't? Implications. Conclusion. Proof and pathology. Significant differences. The whole story?</i>	
<b>Index</b>	<b>241</b>
